##### **INDUSTRIAL FASTENER MANUFACTURING**

Reliable Supply. Controlled Execution.

Sangam Fasteners Private Limited is a manufacturing-focused industrial fastener company based in Hubballi, Karnataka. Since 2000, we have manufactured standard and custom fasteners for applications where dimensional accuracy, material reliability, and repeat supply consistency are mandatory.

##### **Company Snapshot:**

- Established: 2000
- Location: Hubballi, Karnataka, India
- Business Type: Manufacturing Unit
- Product Scope: Industrial Fasteners
- Market Focus: OEM & Engineering Customers

##### **What We Do:**

We manufacture fasteners used in load-bearing and function-critical assemblies. Our work is evaluated by how reliably parts assemble and perform over repeated supplies.

##### **Manufacturing Orientation:**

- Specification-driven production
- Process discipline
- Repeatability across batches
- Long-term supplier stability

##### **Industries Served:**

General Engineering | Infrastructure | Automotive | Heavy Engineering | OEM Manufacturing

##### **Contact:**

Sangam Fasteners Private Limited, Hubballi, Karnataka, India

## PAGE 2 — ABOUT US

Sangam Fasteners Private Limited is an industrial fastener manufacturer incorporated in 2000 and operating from Hubballi, Karnataka.

We operate as a manufacturing organization, not a trading entity. Our relevance in customer supply chains comes from predictable manufacturing behavior, not claims.

Once a fastener is approved, our responsibility is to ensure it performs the same way across every subsequent supply.

Operating Discipline:

- Manufacturing decisions are driven by process control
- Drawings and specifications are executed as approved
- Quality responsibility lies with manufacturing
- Focus is on repeat supply, not one-time orders

## PAGE 3 — PRODUCTS

Industrial Fasteners Portfolio

Our products are evaluated by performance in assembly and service, not by names alone.

Product Range:

- Bolts & Hex Bolts – structural and mechanical assemblies
- Nuts – controlled thread engagement
- Studs & Double-Ended Studs – alignment-critical applications
- U-Bolts – clamping and mounting requirements
- Threaded Components – drawing-based OEM parts
- Custom Fasteners – manufactured as per specifications

All products are manufactured strictly as per approved drawings with focus on repeatability.

## PAGE 4 — ENGINEERING & QUALITY

Engineering and quality systems exist to control variation.

Manufacturing & Quality Focus:

- Process discipline
- Material control
- In-process inspection
- Thread and dimensional verification
- Final inspection prior to dispatch

Objective:

Predictable, assembly-ready output across repeat orders.

## **PAGE 5 — INDUSTRIES WE SERVE**

We supply industries where fasteners influence safety, uptime, and performance.

Industries:

- General Engineering
- Infrastructure & Construction
- Automotive & Auto Components
- Heavy Engineering
- OEM Manufacturing

Application understanding drives how we manufacture, inspect, and supply.

## **PAGE 6 — WHY CHOOSE US & CONTACT**

Why Customers Retain Us:

- Process stability across batches
- Specification discipline
- Manufacturing accountability
- Customization without instability
- Delivery commitments you can plan around
